PASSION

I am Passionate about competitive programming. I thrive on solving complex problems through coding, constantly pushing myself to enhance my skills and revel in the thrill of algorithmic challenges.

Achievements

Profile Info

Hey! 🌟 I'm Suman Khatri, a student and passionate web developer diving into frontend technologies. On a journey to master both frontend and backend, aiming to become a proficient full-stack developer. 🚀

Education

2077-

Bachelor in Computer Application

Lumbini City College

Skills Summary

- Design and develop UIs for web applications using React.
- Develop and integrate REST APIs seamlessly with React frontend.
- Implement and organize data flow following React's MVC architecture.
- Test React components using various frameworks.
- Tailor React applications to meet client-specific needs.
- Deploy both static and dynamic React apps on production and monitor web traffic.
- Create visually appealing graphic designs and illustrations for React websites.
- Write SEO-friendly commercial content for React sites and social media ads.

Work Experience

In addition to my academic journey, I've gained hands-on experience by successfully building and deploying personal, freelance, and academic projects. I've actively contributed to the development and deployment of various frontend-based websites. Currently, I'm deeply involved in constructing a Fullstack application. Eager to leverage my skills and contribute to innovative projects as I seek to join a dynamic team in a professional setting!
